

HOME EMERGENCY PREPAREDNESS CHECKLIST

- Hot water heater secured to wall (all homes in this area should have this already completed when purchased)
- Locate gas, electric and water shut offs
- Wrench to turn gas valve off
- Evacuation plans from your home
- Establish secondary emergency exit from each room in your home
- Identify tall items that could block an exit if toppled over (secure to a wall if necessary)
- Store 72 hour emergency kit in a grab and go location
